SNEHA NAGARAJ

BCA STUDENT | ASPIRING WEB DEVELOPER

Bengaluru, Karnataka | Phone: [Your phone number] | Email: [Your email address]
GitHub: [Add your GitHub profile link] | LinkedIn: [Add if available]

PROFILE

Motivated Bachelor of Computer Applications (BCA) student with an interest in web development, Python and cloud computing. Eager to apply classroom knowledge through practical projects, learn new technologies and contribute to real-world software development work.

EDUCATION

Bachelor of Computer Applications (BCA) — 5th Semester

RR Institution | Bengaluru, Karnataka

TECHNICAL SKILLS

Web	HTML, CSS, JavaScript, React.js (academic practice)
Programming	Python (fundamentals)
Cloud	AWS Cloud Computing (fundamentals)
IoT	ESP32, DHT22, SW-420 sensors, LEDs and buzzer
Tools	Visual Studio Code, GitHub (beginner)

PROJECT

IoT-Based Predictive Maintenance System

An IoT project designed to monitor machine conditions using temperature and vibration sensors. The system aims to identify unusual readings and provide alerts using LEDs and a buzzer, helping detect possible faults early and reduce unexpected machine downtime.

Technologies: ESP32, DHT22 temperature sensor, SW-420 vibration sensor, LEDs and buzzer.

CERTIFICATIONS

- AWS Cloud Computing
- Python

AREAS OF INTEREST

Frontend Development • Web Development • Python • Cloud Computing • Internet of Things (IoT)
